Medifactum.AI Legal-Medical Analysis

Hamady Boly

Case number: 3 | Workers Compensation | Minnesota

Executive summary

Medical bills were issued by Allina Hospitals and Clinics (Billing Office – Claims, Billing Office – Legal, Billing Office), Tillges Certified Orthotic Prosthetic Inc., ALLINA HEALTH SYSTEM, North Memorial Medical Center (Billing), Psychotherapy & Healing Associates, and RAYUS Radiology (FKA Center for Diagnostic Imaging – Central Release). Billing period: 2023-04-21 to 2026-02-12, currency: US dollars. Claimant Hamady Boly underwent a deposition exam on 2023-04-19 with Dr. Duram and Dr. D’Amato. An independent medical re-evaluation on 2025-01-22 in St. Paul, Minnesota diagnosed a degenerative medial knee with chronic meniscal tear, meniscal deficiency, and varus deformity, attributed to pre-existing degeneration. No maximum medical improvement applies. Future treatment recommends high-tibial osteotomy with bone grafting; an unloader brace is effective. Work capacity restrictions are reasonable and permanent due to degenerative knee. Prognosis is improving with brace and surgery is expected to further improve function.

Claimant profile

KEY OPINION AT A GLANCE

Diagnosis	Degenerative medial knee with chronic meniscal tear, meniscal deficiency, and varus deformity.
MMI opinion	No MMI applicable; pre-existing condition; no PPD.
Causation opinion	No work-related injury; pre-existing degenerative knee; natural progression.
Work capacity / restrictions	Restrictions reasonable; permanent due to degenerative knee; unloader brace effective.
Future treatment recommendation	High-tibial osteotomy with bone grafting; no arthroscopic chondroplasty.
Prognosis	Improving with brace; surgery expected to improve function; chronic degenerative knee may improve but limited long-term.
